RIVERSIDE NURSERY

Supplement to Catalog B.

SPOKANE, WASHINGTON

PLEASE READ CAREFULLY BEFORE ORDERING.

The prices in this Supplement take the place of prices in Catalog B on such varieties as are mentioned herein.

NEW AND ADDITIONAL VARIETIES

We have added to our stock many new and rare kinds of shrubs and trees. Also many new hardy perennials that are very beautiful, and some of them are very rare.

PEONIES—We are now prepared to supply a fine collection of the finest and rarest peonies in cultivation.

IRISES—The rainbow flower. The flower of the artists and poets. We are now making a specialty of this wonderful class of plants. Nowhere in the floral world can there be found such a large number of colors and blendings, many of them exceedingly beautiful and fairly rivaling the orchids. All are handsome and perfectly hardy and of easy culture, except a few kinds, which are not generally offered for sale. They should not be planted in wet ground; but most of them do best in ordinary moist soil. They will even succeed in ground so poor and dry where no other flower can be grown.

See our list of varieties further on in this Supplement, which we now offer. Next year we will be able to supply about three hundred kinds.

LARGE TREES.

For many years we have been growing large and shapely specimens of many kinds of deciduous and evergreen trees and shrubs, viz.: Maples, Oaks, Elms, Birch, Locust, Horsechestnuts, Spruces, Firs, Arborvitae, etc. With our system of growing and digging, they generally succeed well. Prices on application.
